

Varied Service Delivery and Supervision of SLPAs and Graduate Students

1. Determine baseline

1. SLP supervisor determines baseline knowledge of and experience with varied service delivery models by SLPA or graduate student prior to developing plan of care they will implement.

2. Provide models

2. SLP supervisor provides models/examples of implementation for SLPA or graduate student to observe.

3. Determine data collection

3. Work with SLPA to determine data collection method(s) that best suit the form of varied service delivery implemented to allow for accurate and efficient documentation.

4. Evaluate outcomes

4. Evaluate outcomes of varied service delivery by reviewing client/student performance and progress with SLPA.

5. Continue or change

5. After consulting with SLPA/graduate student, SLP supervisor determines whether to continue or change service delivery method.
