

**ASHA**

American  
Speech-Language-Hearing  
Association

April 13, 2021

The Honorable Joseph Hardy  
Nevada Senate  
316 California Avenue, #519  
Reno, NV 89509

RE: ASHA Comments on Telehealth; SB 326

Dear Senator Hardy:

On behalf of the American Speech-Language-Hearing Association, I write in support of Senate Bill 326, which authorizes health care providers holding a license or certificate in another state to provide services via telehealth/telehealth to a patient/client located in Nevada if they register with the regulatory body that regulates their profession in Nevada.

The American Speech-Language-Hearing Association (ASHA) is the national professional, scientific, and credentialing association for 218,000 members and affiliates who are audiologists; speech-language pathologists; speech, language, and hearing scientists; audiology and speech-language pathology support personnel; and students. Over 800 ASHA members reside in Nevada.<sup>1</sup>

As the leading national organization for the certification and advancement of audiologists and speech-language pathologists (SLPs), ASHA supports the development and use of telepractice or telehealth. ASHA maintains a collection of professional practice documents, including a position statement that defines telehealth as “the application of telecommunications technology to deliver professional services at a distance by linking clinician to client, or clinician to clinician for assessment, intervention, and/or consultation.”

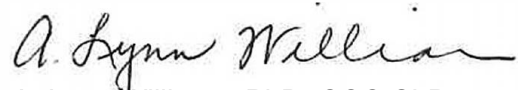

These documents include a technical report and service delivery guidelines that may be accessed on ASHA’s website at <http://www.asha.org/Practice-Portal/Professional-Issues/Telepractice/>.

Research demonstrates the equivalence of telehealth to in-person service delivery for a wide range of diagnostic and treatment procedures for adults and children.<sup>2</sup> Studies have shown high levels of patient, clinician, and parent satisfaction supporting telehealth as an effective alternative to the in-person model for delivery of care.<sup>3</sup> Telehealth expands practitioners’ availability to those in need—regardless of geographic location—saving time and resources for both the provider and the patient.

Despite proven benefits, telehealth remains underutilized nationwide within audiology and speech-language pathology due to a lack of clear state laws governing its use or mandating appropriate reimbursement for services delivered. Providing additional clarifications allowing health care providers to offer their services via telehealth will further support the health care needs of Nevada residents during the COVID-19 pandemic and into the future.

Thank you for your consideration of ASHA's support for SB 326. If you or your staff have any questions, please contact Eileen Crowe, ASHA's director, state association relations, at [ecrowe@asha.org](mailto:ecrowe@asha.org).

Sincerely,

A. Lynn Williams, PhD, CCC-SLP  
2021 ASHA President
