

## ACCREDITATION STANDARDS INVENTORY - CANDIDACY

After a candidacy site visit has been concluded, the site visit team must complete the following inventory on the team's ability to verify evidence, including relevant documentation, of the program's development and achievement towards compliance with the Standards for Accreditation in speech-language pathology and/or audiology. CAA will seek verification in the candidacy site visit report and the program's application and correspondence that the program has progressed in its development, consistent with the [Standards Compliance Continuum](#). Standards for which the site visitors could not verify evidence for development obviously and directly must be identified along with the site visit team's detailed observations in the body of the candidacy site visit report.

**Key:**

**P** = Compliance with the standard is planned and a timeline is established for meeting compliance expectations

**I** = Plan is implemented; compliance expectations met

**M** = Plan is implemented and compliance maintained; program improvements have been initiated
