

# 2008–2009 Academic Year State-by-State Data on Graduate Education in Communication Sciences and Disorders

Source of Data: HES Graduate Guide Survey

Suggested citation:

American Speech-Language-Hearing Association. (2010). *State-by-State Data on Graduate Education in Communication Sciences and Disorders for Academic Year 2008–2009*. Rockville, MD: Author.

## **Introduction**

The Higher Education Data System (HES) was developed by the American Speech-Language-Hearing Association (ASHA) in collaboration with the Council of Academic Programs in Communication Sciences and Disorders (CAPCSD) and the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) to collect and report critical communication sciences and disorders (CSD) program data in a consistent and usable manner. Data collected from the HES will be used to address important issues in the discipline.

The current Graduate Guide Survey is one of six survey instruments within the HES designed to collect valuable data about graduate education in CSD, and it is the primary source of data presented in this report. The data reported in Tables Series 1-8 include state-by-state information on applications, admissions, enrollment, maximum capacity for new admissions, graduation, first employment, average time to degree and the administrative location of academic programs

## **Survey Methodology**

The data contained in Table Series 1-8 (with the exception of “number of existing programs”) were collected between September 1, 2009, and December 30, 2009, via the Graduate Guide Survey electronically distributed to 256 institutions with CSD graduate programs. The electronic survey contains more than 50 questions ranging from yes/no, multi-pick response options, data tables, and open text responses. Data was requested for the “most recently completed academic year fall through summer” thus student cohorts are not the same from application through employment. Over time trend data is expected to emerge regarding student cohorts.

## **Response Rate**

A total of 256 academic institutions received the HES Graduate Guide Survey and 209 academic institutions completed and submitted data, representing an 81% response rate.

Among the 209 institutions completing the Graduate Guide Survey, data was provided by

- 210 master’s programs in speech-language pathology
- 2 master’s programs in speech, language and hearing sciences
- 62 clinical entry level degree audiology (e.g. AuD) programs
- 1 post entry level degree program in audiology
- 1 post entry level degree programs in speech language pathology

Among the 209 institutions completing the survey, 70 offer research doctoral degrees (PhD). Of the 70 institutions, 54 institutions reported data

- 19 audiology research doctoral programs
- 27 speech-language pathology research doctoral programs
- 31 speech, language and hearing sciences research doctoral programs

## **Cautions and limitations of data**

Data were collected for the 50 U.S. states, and Puerto Rico. Data are based on the actual number of programs responding; therefore, no statistical extrapolation was conducted.

Academic programs were encouraged to complete the electronic survey in its entirety; however, some programs did not respond to all questions within the survey or include data for all degree types within an area of study. Therefore, sum totals for “number of programs responding” columns may be variable across tables. Data was collected for all graduate CSD degree programs offered at the institution including non accredited programs. The number of programs listed in a state refers to degree programs available and not discrete institutions. Academic program directors were asked to verify all programs offered or programs they wish to appear on [EDFIND](#). The total number of programs therefore does not equal the total number of [CAA Accredited programs](#) nor equal institutions within the state. Response rates among programs across states are variable.

For data on race/ethnicity and gender, the number of institutions reporting is less than in other tables as many institutions reported that they are prohibited from collecting or releasing data on race/ethnicity or gender. International Status is defined as those students who applied from outside the United States and who have been issued an F1, M1 or J1 Visa by the United States Government.

## **Table of Contents**

### **Applications, Admissions, and Enrollment Data for AY 2008-09**

- Table 1A: Applications, Admissions and First Year Enrollments by Area of Study and Degree Type
- Table 1B: Applications, Admissions and First Year Enrollments of Master's, Clinical Entry Level and Post Entry Level Programs By Area of Study, State and Degree Type
- Table 1C: Applications, Admissions and First Year Enrollments of Research Doctoral Programs By Area of Study, State and Degree Type
- Table 1D: Number of Applications by Area of Study, Degree Type and Gender
- Table 1E: Number of Applications by Area of Study, Degree Type, Race/Ethnicity and International Status
- Table 1F: Number Approved for Admission by Area of Study, Degree Type and Gender
- Table 1G: Number Approved for Admission by Area of Study, Degree Type , Race/Ethnicity and International Status
- Table 1H: Number of First Year Enrollments by Area of Study, Degree Type and Gender
- Table 1I: Number of First Year Enrollments by Area of Study, Degree Type , Race/Ethnicity and International Status

### **Maximum Capacity for Admissions for AY 2008-09**

- Table 2A: Maximum Student Capacity for Admissions by Area of Study and Degree Type
- Table 2B: Maximum Student Capacity for Admissions of Master's, Clinical Entry Level and Post Entry Level Programs By Area of Study, State and Degree Type
- Table 2C: Maximum Student Capacity for Admissions of Research Doctoral Programs By Area of Study, State and Degree Type

### **Enrollments versus Maximum Capacity for Admissions for AY 2008-09**

- Table 3A: First Year Enrollments vs. Maximum Student Capacity for Admissions By Area of Study and Degree Type
- Table 3B: First Year Enrollments vs. Maximum Student Capacity for Admissions of Master's, Clinical Entry Level and Post Entry Level Programs By Area of Study, State and Degree Type
- Table 3C: First Year Enrollments vs. Maximum Student Capacity for Admissions of Research Doctoral Programs By Area of Study, State and Degree Type

### **Graduation Data for AY 2008-09**

- Table 4A: Number of Degrees Granted by Area of Study and Degree Type
- Table 4B: Number of Master's, Clinical Entry Level and Post Entry Level Degrees Granted By Area of Study, State and Degree Type
- Table 4C: Number of Research Doctoral Degrees Granted By Area of Study and State

- Table 4D: Number of Degrees Granted by Area of Study, Degree Type and Gender 2008-2009 Academic Year
- Table 4E: Number of Degrees Granted by Area of Study, Degree Type, Race/Ethnicity and International Status

#### **Employment Data for AY 2008-09**

- Table 5A: Number of Graduates Employed by Area of Study and In-State vs. Out-of-State Employment Status
- Table 5B: Number of Graduates Employed by Area of Study, State and In-State vs. Out-of-State Employment Status
- Table 5C: Number of Graduates Employed by Area of Study and Employment Setting
- Table 5D: Number of Graduates Employed by Area of Study, State and Employment Setting

#### **Administrative Location of Programs for AY 2008-09**

- Table 6A: Administrative Location of Programs within Institutions by Area of Study
- Table 6B: Administrative Location of Programs within Institutions by Area of Study

#### **Average Quarters or Semesters to Complete the Program for AY 2008-09**

- Table 7A: The Average Number of Quarters or Semesters Needed to Complete the Program Based on Full-Time Enrollment with a CSD Undergraduate Major by Area of Study and Degree Type
- Table 7B: The Average Number of Quarters or Semesters Needed to Complete the Program Based on Full-Time Enrollment without a CSD Undergraduate Major By Area of Study and Degree Type

#### **Total credit hours for AY 2008-09**

- Table 8A: The Total Number of Credit Hours Required to Complete the Program With a CSD Undergraduate Major By Area of Study and Degree Type
- Table 8B: The Total Number of Credit Hours Required to Complete the Program Without a CSD Undergraduate Major By Area of Study and Degree Type

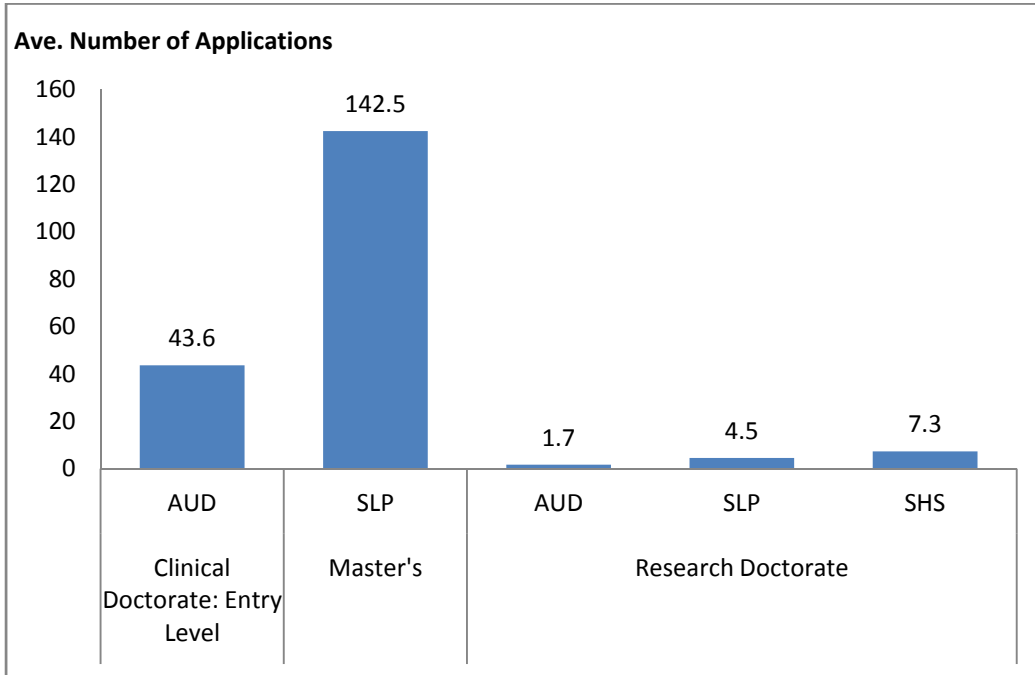

In Tables 1A–1I, it is important to note that the number of applications reported does not reflect a 1:1 correspondence with the number of students applying to graduate programs. Data on average number of applications submitted by students is currently not available. The column “percent of applications offered admissions” reflects applications for which admission was offered and not the number of students. It is not uncommon for any graduate program to receive applications that do not meet graduate admission criteria. Data reported in Tables 1A–1L are based on actual program responses and have not been extrapolated to project responses as if a 100% response rate were attained. Where dashes (-) occur, no data were provided.

Tables 1D–1I include data on race/ ethnicity, gender and international status. The number of institutions reporting these data is less than in other tables because many institutions indicated that they are prohibited from collecting or releasing data on race/ethnicity or gender. International status of students is defined as those students who applied from outside the United States and who have been issued an F1, M1, or J1 Visa by the United States Government.

In Tables 2A–2C, includes data on capacity for new admissions reported by academic programs. States that do not offer a degree program in an area of study or degree type do not appear in the table. Data reported in Tables 2A–2C are based upon actual program responses and have not been extrapolated to project responses as if a 100% response rate were attained. Where dashes (-) occur, no data were provided.

Tables 3A–3C provide information about academic program capacity for newly-enrolled students and actual enrollments. Some variability across capacity for new admissions occurs according to an academic program’s known resources and in some cases, academic programs are able to enroll a larger number of students; hence, enrollments may exceed 100% capacity.

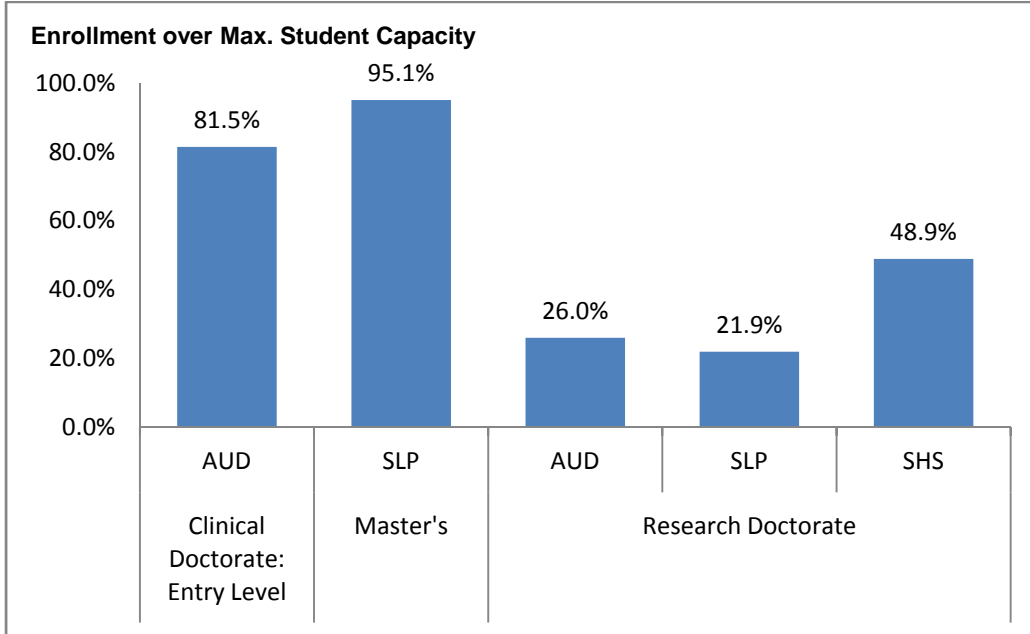

In Tables 3B and 3C, states that do not offer a degree program in an area of study or degree type do not appear in the table. For example, Alaska does not appear in Table 3B as there are no graduate audiology or speech-language pathology entry level degree programs in that state. Rhode Island does not appear in Table 3C as there are no research doctoral degree programs in audiology or speech-language pathology in that state.

Tables 3A–3C are based upon actual program responses and have not been extrapolated to project responses as if a 100% response rate were attained. Where dashes (–) occur, no data were provided.

**Table 3A**  
**First Year Enrollments vs. Maximum Student Capacity for Admissions**  
**By Area of Study and Degree Type**

	Wisconsin	Research Doctorate	1	-	-	-	-

In Tables 4A–4E, information on number of degrees granted is provided. It is important to note that individuals reflected in the “number of degrees granted” data for the current reporting period represent a different cohort of students than those reflected in the “applications, admissions, and enrollments” data in Tables 1A–I, 2A–C, and 3A–C.

In Tables 4B and 4D, states that do not offer a degree program in an area of study or degree type do not appear in the table.

Data reported in Tables 4A–4E are based upon actual program responses and have not been extrapolated to project responses as if a 100% response rate were attained. Where dashes (–) occur, no data were provided.

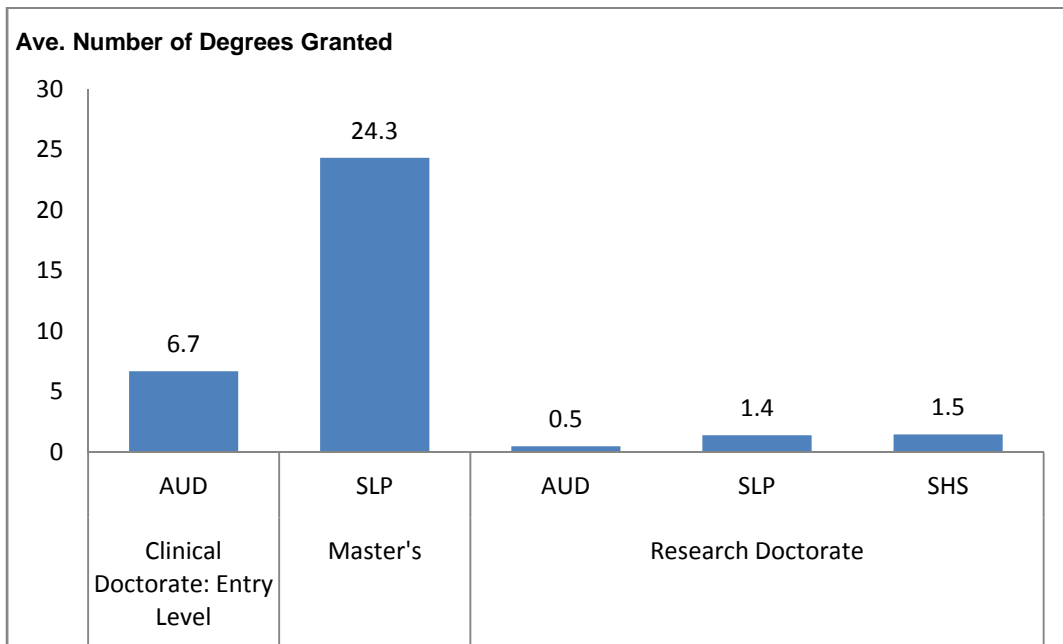

Tables 4D–4E include data on race/ethnicity, gender, and international status. The number of institutions reporting is less than in other tables as many institutions reported that they are prohibited from collecting or releasing data on race/ethnicity or gender.

International Status of students is defined as those students who applied from outside the United States and who have been issued an F1, M1, or J1 Visa by the United States Government

In Tables 5A–5D, information about first employment of graduates is provided. Employment data reflect first employment post graduation. In Tables 5A–5D the number of existing programs includes all degree types within each area of study. The number of audiology programs includes both clinical entry level doctoral and research doctoral degree programs combined. For example, the audiology number of existing programs includes both clinical entry-level doctoral degrees and research doctoral degrees.

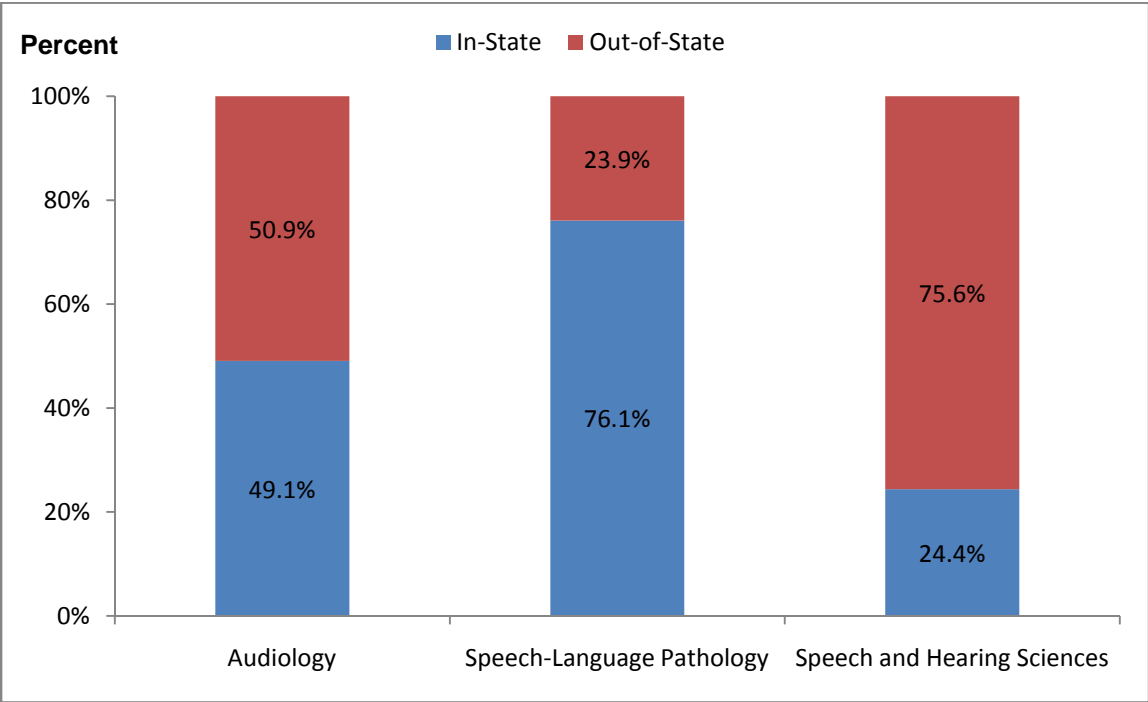

In Table 5B, states that do not offer a degree program in an area of study or degree type do not appear in the table.

Data reported in Tables 5A–5D are based upon actual program responses and have not been extrapolated to project responses as if a 100% response rate were attained. Where dashes (-) occur, no data were provided.

\*Programs were given the opportunity to specify where the program is administratively housed if the location did not appear in the response options within the survey. The following are the reported titles provided by programs. More than one program or institution may have indicated the following title:

- College of Arts and Sciences
- College of Arts and Sciences, Dept of Communication Sciences and Disorders
- College of Behavioral & Community Sciences
- College of Education and Health Professions
- College of Education and Health Sciences
- College of Education and Human Sciences
- College of Education and Human Services Department of Social Work and CSDS
- College of Education and Professional Studies
- College of Fine and Applied Arts
- College of Graduate Health Sciences
- College of Health and Human Development
- College of Health and Public Affairs
- College of Human Ecology
- College of Human Sciences and Services
- College of Humanities and Social Sciences
- College of Integrated Science and Technology
- College of Integrated Sciences and Disorders
- College of Liberal Arts
- College of Liberal Arts, Dept. of Speech, Language & Hearing Sciences
- College of Nursing & Health Sciences
- College of Nursing And Speech-Language Pathology
- College of Science
- College of Science and Health
- College of Science and Technology – School of Health Sciences
- Department of Biological and Health Sciences, College of Arts and Sciences

- Graduate School
- Graduate School and Professional Programs
- Health and Human Services
- Independent School of Audiology and Speech-Language Pathology
- John A. Burns School of Medicine
- Our doctoral program is currently inactive
- Reap College of Education and Human Development
- School of Audiology and Speech-Language Pathology
- School of Behavioral and Brain Sciences
- School of Communications
- School of Health & Rehabilitation Sciences
- School of Health Sciences and Practice
- School of Nursing and Health Sciences
- School of Speech, Language and Hearing Sciences
- Speech, Language, and Hearing Sciences

Data reported in Tables 7A–7B are based on actual program responses and have not been extrapolated to project responses as if a 100% response rate were attained. Where dashes (-) occur, no data were provided.
