CREATE A **SEARCH STRING**

Fill in keywords and Boolean Operators (AND, OR) to create a search string.

NOTE: You can use more keywords to narrow your search or use fewer keywords to broaden your search

EXAMPLE: adult AND ("traumatic brain injury" OR TBI OR "head injury") AND ("cognitive training" OR "cognitive therapy" OR "cognitive rehabilitation") AND (executive OR communication OR memory)

POPULATION [Traumatic Brain Injury]	**INTERVENTION** [cognitive rehabilitation]	**OUTCOME** [cognitive communication]
Synonym or Related Term [TBI]	**Intervention** [cognitive training]	**Outcome** [executive function]
Population [head injury]	**Intervention** [cognitive therapy]	**Outcome** [memory]
