Audiologists and SLPs provide treatment to people of all ages, from infants to older adults.

Speech-language pathologists (SLPs) identify, assess, and treat speech, language, cognitive communication, and swallowing disorders.

Audiologists specialize in preventing and assessing hearing and balance disorders as well as providing audiology treatment, including hearing aids.

Making effective communication, a human right, accessible and achievable for all.

From 2018–2028, Idaho is expected to see ...
