**ASHA**  
American  
Speech-Language-Hearing  
Association

## General Objective

The overall objective of the ASHA-PAHO/WHO Project is to strengthen knowledge and build capacity of professionals, institutions, and/or organizations that address communication disorders in the areas of speech, language, swallowing, and hearing.

## Specific Objectives

The specific objectives of the project are:

- To develop joint activities involving content knowledge, provided by content experts who will conduct training and educational programs in countries selected by ASHA-PAHO/WHO in order to address issues related to speech, language, swallowing, and hearing problems and prevention, identification, intervention, and rehabilitation according to the needs identified at the country level.
- To improve awareness of gaps between needs and availability of audiology and speech-language pathology services in the region

## The ASHA-PAHO/WHO Project Implementation Carried out by ad hoc committees of ASHA member volunteers

In 2013, ASHA and PAHO/WHO selected three countries for joint collaboration:

**HONDURAS:** Provide technical assistance required for the development of a program in communication disorders at the Universidad Nacional Autónoma de Honduras (UNAH)

**EL SALVADOR:** Provide technical assistance to the Instituto Salvadoreño de Rehabilitación Integral (ISRI) to strengthen human resources engaged in rehabilitation of communication disorders

**GUYANA:** Provide consultation and assistance to the Ministry of Health (MOH) to strengthen Guyana's strategic plan for early detection and intervention of communication disorders

In 2016, ASHA and PAHO/WHO added one new country:

**PARAGUAY:** Provide technical assistance to the Ministry of Health (MOH) and the National Secretariat of Human Rights for Persons with Disabilities (SENADIS) to educate professionals and parents of individuals with communication disorders

In 2017, ASHA and PAHO/WHO added one new country:

**BELIZE:** Provide technical assistance to the MOH, the Inspiration Center and its partners to educate healthcare and community service providers about communication disorders

Coordinator and students enrolled in new Phonoaudiology program at UNAH, Honduras.

## The WHO Global Disability Action Plan 2014–2021: Better Health for All People with Disability

This action plan enables WHO member countries and international partners (i.e. ASHA-PAHO/WHO) to work together to improve the health and human rights of people with disabilities.

## The WHO Rehabilitation 2030: A Call for Action

In February 2017, ASHA took part in a Stakeholder Consultation meeting to discuss the strategic direction for coordinating action and implementing joint commitments to increase the awareness of rehabilitation as a health strategy for all people across the lifespan and across the continuum of care.
