

**LESSONS FOR SUCCESS RESEARCH CONFERENCE  
RESEARCH STATEMENT**

Name:

Education:

*List chronologically the year, degree, university, and major for each degree awarded (or in progress) as well as postdoctoral fellowships if applicable.*

Current Affiliation:

*Current Position: (e.g., doctoral candidate seeking faculty position; post doctoral fellow; assistant professor)*

*The five year research statement should be a roadmap that is accessible to a relatively broad audience of academics. It should provide a clear and succinct picture of your short and long term programmatic research goals. For the present purposes, write a one page summary of your five year research goals and strategies, incorporating the following components:*

- 1. Overarching goals, including the theoretical framework or model to be tested, questions you plan to address, and the significance of your program of research.*
  
- 2. A general experimental or methodological section that provides sufficient detail to demonstrate the nature and innovation behind your overall approach(es) to accomplish your research aims (do not describe individual experiments).*
  
- 3. Brief statement of the relevant funding sources you plan to target.*
