Enhancing Service Delivery Across the Continuum

INTRODUCTION

As the professional landscape continues to evolve, audiologists and speech-language pathologists must provide high-quality, skilled services while at the same time serving a greater number of individuals and demonstrating the value of the services they provide. This webinar explores current trends in the professions and offers advice to help professionals manage their workload, make the most of their time, and best serve new and existing clients, patients, and students. Specifically, the webinar discusses practicing at the top of the license, working with assistants, using the ICF framework to document services, exploring and implementing a range of service delivery options, and collaborating with an interprofessional team. The webinar also points to ASHA’s resources to help professionals achieve these goals.

LEARNING OUTCOMES
You will be able to:

- identify ways to practice at the top of the license
- write functional goals using the ICF framework
- manage your workload by implementing alternative service delivery options, such as consultations or telepractice

CONTENTS

- ASHA’s envisioned future and pathway
- The changing landscapes in health care and education
- What it means to reframe the professions
- Service delivery options – including assistants, telepractice, and interprofessional education and interprofessional practice (IPE/IPP)
- Writing functional goals using the International Classification of Functioning, Disability and Health (ICF) framework
- What you can do today to make a change
