Appendix D—Bibliography

There were many resources consulted in the process of identifying possible emerging areas of clinical practice (see Appendix B). Resource consultation included a review of tables of contents of journals, conference proceedings, and convention programs; minutes of professional meetings; and discussions with professional staff at ASHA and related professional service organizations. The following bibliography reflects a selection of resources that were helpful in examining a particular area of practice in more detail. As it was not the charge of the team to perform an in-depth literature review, the bibliography is not comprehensive and is provided for convenience of the reader.
